

# Making an energy-saving stove

1.

Mix the clay with water.

2.

Form the stove.

3.

Leave it in the sun for 3 hours to dry.

4.

Place sticks on top of the stove. Hold it together with the clay mud.

5.

Make cooking holes the size of a saucepan on the top. Leave the stove in the sun for 3 days to dry.

7.

Spread soft clay on the stove. Leave the stove to dry another 3 days.
