

# Problem Solution

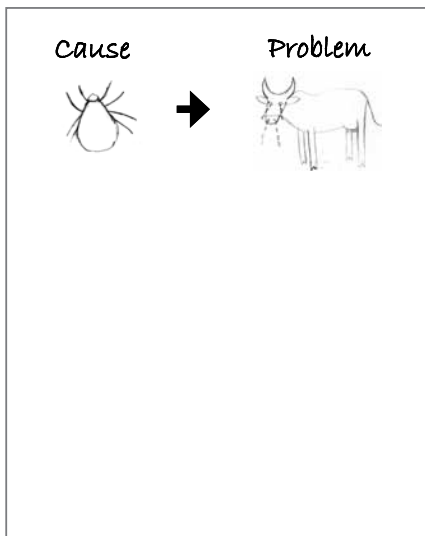

1.

What is the problem? Draw the problem prioritized in the pairwise ranking activity in the upper right of the flipchart.

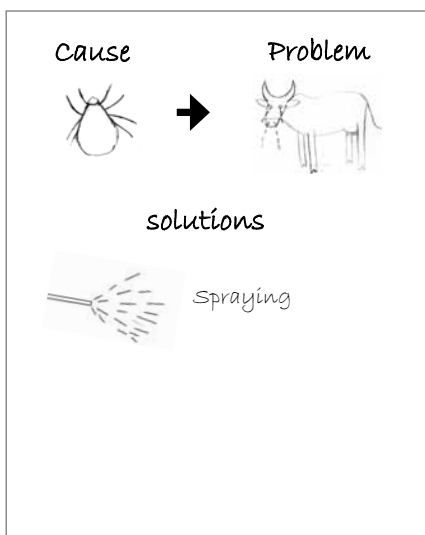

How is it affecting production?

2.

What is causing this problem? Draw the cause(s) in the left corner with an arrow leading to the problem. Is there anything else causing that problem?

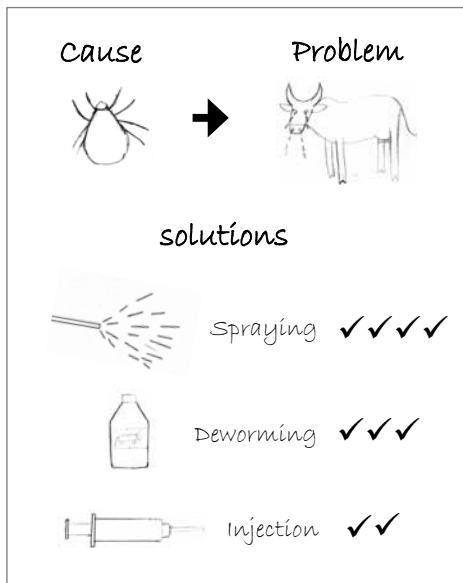

3.

What have you been doing about it? Draw possible coping methods with a short label.

What else can we do? Draw picture of more solutions being added to the list.

4.

Go through each solution and give a tick mark for every answer that is a yes using the questions below:

Is it easy to sustain over time?  
Does it increase productivity?  
Can it be done quickly?  
Does it benefit everyone?  
Is it affordable?

What is the best solution? Draw a circle around the solution that has the most tick marks.

Are there other solutions that had many tick marks?  
Add them to the learning activities.

5.
