

# Visioning Activity

**Objective:** To compare where they are coming from and where they want to go with their agropastorial livelihood situation.

1. Brainstorm about the current situation and ask the group the following questions:
  - *What does your garden look like now? What kind of garden would you like to have?*
  - *What do your animals look like now? What would you like them to look like?*
  - *How many meals does your family eat in a day? What would you like that to be?*
  - *How much are you earning from your animals or garden? How much do you want to earn?*
  - *What practices or tools are you currently using? Are there any practices or tools that could improve your situation?*

2. Have participants work together and draw a picture of their current situation on the flip chart. Be sure they show their garden and/or animals and their environment.

3. Have participants draw a picture of their ideal situation for the future on another paper.

4. Copy the two drawings to the grain sack charts so the group can refer to them later.
